

WONDER

- **WONDER** is a fully water-soluble formulation in powder form useful for all types of nurseries (vegetable, ornamental, plantation, forestry)
- **WONDER** is used for improving the germination of hard coated seeds, to get quicker germination and to achieve uniform emergence of seedlings
- **WONDER USAGE METHOD :** Dissolve 1 sachet of 25 gram of WONDER in 1 litre of clean (drinking) water to make ready solution. Soak the seeds in this ready solution for 4 to 8 hours, depending upon the seed coat hardness. Take out the seeds and sow immediately. The ready solution may be re-used if it is not contaminated
- **WONDER COMMERCIAL INFORMATION :**
